Q1    Limitations  of  HTML 4:-

1) It is not provide Audio support.
2) It does not provide video support.
3) We cannot draw shape using HTML 4.0 (i.e. canvas)
4) We cannot embeded animations (both 2D & 3D using HTML 4.0)
5) It has very few input controls available in form tag.
6) It does not allow Javascript to run on browser.

CSS overcome those limitations:-

1) We just need to write style once, rather than inline css, browser can apply the style many times.
2) By using CSS, we can easily insert media.
3) We can apply animation (both 2D & 3D).
4) We can easily apply transitions, without using any external pluggins.

Benifits of css:

i) Light weight code

ii) Faster download times

iii) Easier to maintain & update

iv) More formatting options

v) Greater consitency in design

vi) Greater accessibility
