Statement of Purpose

Name of the applicant: Kashyap Shah

Course applied: Computer Engineering

We are currently within the midst of a technological and computing revolution that may drastically change our lives and potentially redefine what it means to be human. I am very excited at the prospect of devoting my long-term career to such a dynamic, fast-advancing field. Ever since i used to be young, I have got enjoyed dabbling with computers and experimenting with different applications. It's my central goal to continue my education during a more competitive, elite, and international environment. I have got benefited vastly from the breadth of CHARUSAT University's undergraduate syllabus and gained a comprehensive exposure to several core areas of the sector. In my four years of study at CHARUSAT University, I have got learnt a way to maintain an independent approach altogether my endeavours.

During my early ages in class, I used to be introduced to basic languages and on how computers is used and programmed. From then, I became fascinated about computers and their programming. After I entered the high school, i used to be made known with languages like 'Java' and 'HTML' on my personal interest. In my second year of high school, I made a BAKERY MANAGEMENT SYSTEM, in "Java" with help of Net beans GUI. Then in the four years of my undergraduate, I have learnt many languages. Upon which I have a keen interest in website development languages like HTML, CSS, JavaScript and their frameworks.

My ultimate goal in my career is to form a commendable contribution to the computing world either by starting an innovative venture or doing research which might change the scale of future computing and therefore the way we perceive the computers. Now I have got determined that an avid study on engineering science will enable me to aggregate all my previous knowledge & experience on the sphere and encourage in achieving my career goal. I am sure that my academic records and practical knowledge combined with my eagerness to try to research exhibit the perseverance and zeal required to pursue a Master's Degree in your reputed university.

My course work together with my extensive engineering science background will allow me to function well within the graduate program. I have got many ambitions for myself as I start this stage of my life. i feel that a graduate study will provide milestone in my career together with invaluable experiences and skills which will allow me to become a successful, innovative professional and offers assistance to accomplish my goals.
